Dear Friends,

As I reflect on my 22 years in medical nonprofit leadership, the events of this past year — my first year at St. Joseph Hospital — are the ones that touch me the deepest because they demonstrate genuine acts of compassion and giving by friends like you. I am so very blessed to have joined this Hospital and work for an organization that cultivates kindness for the greater good!

Last year was a phenomenal year as we celebrated our 90 years of healing and realized funding for many key accomplishments, such as the buildout of the Mother-Baby Assessment Center, the second ION device, which improves early diagnosis and long-term survival rates for lung cancer patients (see page 9), and the Mako® robot, which results in less pain and a quicker recovery for patients after hip and knee replacements.

We not only concluded last year strongly, but the last decade could not have been more outstanding! The Foundation met its \$75M comprehensive multi-year campaign goal — which provided philanthropic support for innovative technology and growth of key programs. This was made possible by the compassionate generosity of people like you. Your support of Hospital initiatives provides the resources needed to continue to advance clinical excellence and obtain new technology to improve patient outcomes and to enhance each patient’s care experience.

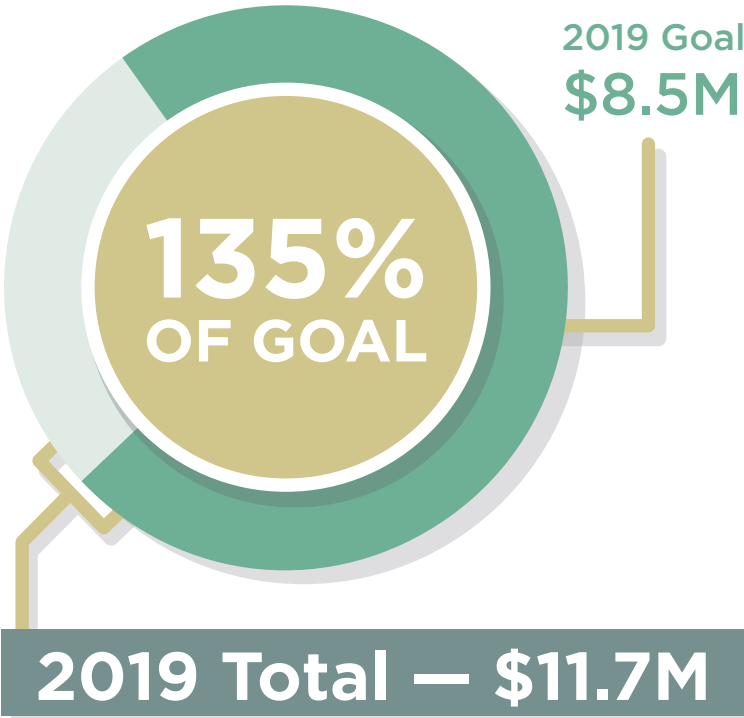

Amid all the current increased health care needs, I continue to look forward to the opportunity to help advance the development of the much-needed Progressive Care Unit buildout and the long-awaited Main Street Women’s and Family Center. This structure is poised to change the facade of the Hospital entrance as the impressive building will sit on the northeast corner of Main Street and Stewart Drive.

As an organization founded on assuring that compassionate and quality health care is available in our community, we remain steadfast in our dedication to the health and the well-being of our patients, staff and community amid the rapid changes of COVID-19.

Your unwavering support is inspiring and greatly appreciated during this unprecedented time. Thank you for your commitment to serve your community every day.

Warmly,

Amy Daugherty
Amy Daugherty
Chief Philanthropy Officer

“When we focus on others, we learn about ourselves. My personal experience with donating has given me a sense of accomplishment and satisfaction.”

Philanthropy is Good for the Soul

— Shirley Moretti

Research shows that generosity can lower stress levels and create a more meaningful life. Shirley Moretti, St. Joseph Hospital Foundation Board Member, Legacy Society member and friend to the Ministry, viewed generosity as a way of life and believed that it could change hearts and minds.

As a breast cancer survivor and patient of St. Joseph Hospital, Shirley experienced the legacy of the Sisters of St. Joseph of Orange first-hand. The Sisters’ service to the Hospital and its patients was something that stuck with her throughout her life. Inspired by their commitment, kindness and compassion, Shirley began thinking of how she could give back.

Shirley later began to volunteer at St. Joseph Hospital, assisting newly diagnosed cancer patients with needed support, two of which were her own sisters. Personally invested in the fight against cancer, Shirley became a member of the Cordelia Knott Wellness Foundation (CKWF) and eventually directed the merger between CKWF and the St. Joseph Hospital Foundation. One of the many positive outcomes from the merger includes the establishment of Ginny’s Shop at St. Joseph Hospital, which provides products and services for patients undergoing cancer treatment or follow-up care.

Realizing that her personal values aligned with that of St. Joseph Hospital, Shirley joined the Foundation Board in 2012, which she called “the experience of a lifetime.” Her leadership and generosity were key components in the success of the Foundation over the years. In 2014, she was named the Spirit of St. Joseph Award Honoree in recognition of her outstanding contributions of time, talent and treasure.

Shirley established a charitable remainder trust with St. Joseph Hospital as the beneficiary. Just last year, she made an extraordinary planned gift and established the Shirley J. Moretti Nurse Navigator Endowment, which will fund the Nurse Navigator Program, as a way to help many other patients throughout the Hospital. The program offers patients and their families the valuable resources they need to not only navigate through the campus, but calm the mind, strengthen the spirit and concentrate on what matters most — healing.

Shirley passed away in November, but her generous gifts will serve patients for years to come, and her passionate spirit will long be remembered. Giving back to others was one of Shirley’s greatest joys in life — it filled her heart and has inspired countless others to follow in her footsteps. We, here at St. Joseph Hospital, miss her partnership, advocacy and especially her warmth and friendship.

Legacy Society Luncheon

The Sister Frances Dunn Legacy Society Annual Appreciation Event, held in September at the St. Joseph Center, was a wonderful occasion for the gathering of new and old friends. The afternoon included a blessing from Sister Nadine McGuinness, three-course lunch, hospital update from St. Joseph Hospital Chief Executive, Jeremy Zoch, and a presentation on Nursing Excellence by Patti Aube, MSN, RN, Director of Nursing Professional Development, Nursing Research, Volunteer Services and Magnet® Program. The Hospital has recruited more than 80 new nurses, many of whom have

advanced nursing degrees and certifications. Patti was joined by two nurses who touched on how the Nursing Excellence initiative has motivated them to continue their nursing education, which allows St. Joseph Hospital to continue delivering compassionate, quality health care.

The Legacy Society was formed to give special recognition to individuals who have named the Hospital as a beneficiary of their estate or established a CGA with the Hospital.

To learn more about the Sister Frances Dunn Legacy Society, contact Philip Barker at (714) 347-7900 or philip.barker@stjoe.org.

St. Joseph Hospital Meets Community Need for Kidney Transplant

St. Joseph Hospital recently performed two successful kidney transplants, just days after finalizing the agreement to move the transplant program from the now-shuttered St. Vincent Medical Center in Los Angeles.

Approximately 400 patients on the waitlist for kidneys were transferred to the St. Joseph Kidney Transplant Program which fills an important community need by continuing to provide access to this complex life-saving procedure. We are grateful that we could provide seamless care for these vulnerable patients who often wait years for a life-saving transplant.

Wendy Escobedo, MSN, RN, PHN, CCTN, Director of Renal Services, Dialysis and Transplant, and the team

Celebration 2019 Breaks Record for The Nursing Center of Excellence

Celebration 2019, supported by Marsha Moeller and presented by Centaurus Financial, Inc. and The Gooding-Barry and Immell Families, netted a record-breaking \$676,000 for the Nursing Center of Excellence while celebrating 90 years of healing at St. Joseph Hospital.

For the past 90 years, St. Joseph Hospital, its physicians, nurses and all the caregivers, have kept up with the growth of Orange County while continuing to provide quality, compassionate and excellent care to our Dear Neighbor.

The event, co-chaired by Dr. Warren D. Johnston and Mrs. Marsha Moeller, attracted more than 600 guests to the City National Grove of Anaheim to support the Hospital and enjoy an evening of fine dining, auctions and raffle, raise the paddle, and a wine and spirits wall.

Highlights of the evening included the presentation of the Spirit of St. Joseph Award, which honors donors who embody the Spirit of St. Joseph in their work, which was presented to Evelyn Freed and Robert Stauffer. The evening was highlighted with a live performance by Pat Benatar and Neil Giraldo.

Mako® Technology

In 2019, the philanthropic voice of our St. Joseph Hospital community was heard after hundreds of donations helped fund the purchase of the Mako RIO® Robotic-Arm Interactive Orthopedic System from Stryker Corporation. As a result, St. Joseph Hospital became the first hospital in Orange County to offer MAKOpasty® robotic-assisted partial knee and total hip replacement surgery.

The RIO system gives surgeons better predictability in surgical outcomes by enabling them to create a 3D model of the patient's anatomy prior to surgery, thereby allowing for precise preoperative planning. This, paired with the technology's minimally invasive capabilities, typically yields positive results for patients, including less blood loss, lower rate of bone and soft tissue damage, reduced length of stay, and less post-operative pain. Within two weeks of surgery, patients often experience an excellent return of motion with minimal pain.

"The most rewarding aspect of utilizing robotics in joint replacement surgery is seeing how patients recover faster and with a significantly lower rate of complications than they would with traditional surgery," says Dr. Ayaz Biviji, orthopedic surgeon at St. Joseph Hospital. "Without the generous support our St. Joseph Hospital communities have shown, we would be unable to acquire the advanced surgical technologies our patients have come to rely on at St. Joseph Hospital."

With a strong commitment to providing high-quality, compassionate care for patients, the St. Joseph Hospital Orthopedics Program utilizes a comprehensive team approach, resulting in national acclaim for the program.

To help the Orthopedics Program continue to offer life-changing procedures through surgical technology such as the Mako RIO Robotic-Arm Interactive Orthopedic System, please visit sjo.org/foundation.

ION Technology

Funded entirely by philanthropy, St. Joseph Hospital recently acquired the ION System for Robotic Bronchial Navigation. The revolutionary system offers patients huge advancements in minimally invasive lung biopsy procedures, which helps in the early detection of lung cancer and increases the likelihood of survival.

The ION System

Most lung cancer begins in the peripheral region of the lungs, which is difficult to navigate, but using the ION System's combination of robotics and digital imaging software, peripheral nodules can be easily mapped out and reached. The ION System's flexible endoscope can articulate 180 degrees in any direction, allowing it to reach all 18 segments of the lungs, and the mapping technology allows clinicians to have a real-time, map-like view of the pulmonary region.

The project's fundraising goal of \$600K was met, in large part, thanks to an anonymous donor who made a generous donation of \$100K in honor of her late husband.

"I am so proud to support St. Joseph Hospital in their efforts to diagnose and treat lung cancer," the anonymous donor states. "Knowing that my donation can make a difference in the life of someone in my community makes it even more meaningful."

The ION System represents a powerful leap forward in our oncologists' ability to detect lung cancers early and stop them in their tracks.

To learn how you can make a difference at St. Joseph Hospital's Center for Cancer Prevention and Treatment, please visit sjo.org/foundation.

INNOVATING

for a healthier community

In 2016, St. Joseph Hospital embarked on its \$50 million *Innovating for a Healthier Community* campaign that would impact nearly every patient that walks through our doors. Thanks to you, we exceeded our goal, raising \$75 million through March 2020. Here are a few of our key fundraising priorities in 2020-2021:

Progressive Care Unit

The new Progressive Care Unit will treat medical and surgical patients whose needs are not serious enough for the Intensive Care Unit, but too complex for the regular hospital floor. It will be staffed by specially-trained nurses, who will provide the best treatment, assessment and monitoring needed by their patients at this stage of their care journey.

The new unit will nearly double the amount of intermediate-care beds, moving patients along their care path quicker, thereby reducing wait times and lengths of stay for all patients. The new Progressive Care Unit will allow St. Joseph Hospital to treat more patients and better serve our community.

Improved Cancer Care

The Center for Cancer Prevention and Treatment is continuing to advance cancer care. First introduced to Orange County by St. Joseph Hospital cancer physicians in 2010, Intraoperative Radiation Therapy provides a single dose of radiation immediately after lumpectomy procedures, reducing the need for weeks of daily radiation sessions. Upgrading our current machine will allow St. Joseph Hospital to continue offering this course of treatment, improving the quality of life for our patients.

Cardiac Catheterization Lab

St. Joseph Hospital's cardiac catheterization lab currently fulfills requirements to treat patients with structural heart disease and other complex cases. However, in order to perform a broader range of new therapeutic cardiovascular procedures, advanced 3D imaging and positioning technology need to be added to our current cardiac catheterization lab.

Behavioral Health Services

Our Behavioral Health Center of Excellence treats over 5,000 patients per year, whether they are faced with neuropsychiatric or substance abuse disorders.

As demands for comprehensive behavioral health services continue to rise, our Center will benefit from philanthropic support for two key facets of our Behavioral Health Program: Medically Assisted Treatment Counseling for patients with substance abuse disorders, and a social work endowment fund, to pay full-time social workers who will work with clinicians to develop treatment plans.

Nursing Center of Excellence

Nurses at St. Joseph Hospital have earned, for the third time, the prestigious Magnet® designation from the American Nurses Credentialing Center. Philanthropic support for the Nursing Excellence fund will help provide resources for our nurses to improve patient safety, develop their clinical expertise, and support research to enhance patient care. The Nursing Excellence Endowment will help sustain the Nursing Excellence program for years to come.

You can help St. Joseph Hospital continue building Excellence by contacting the Foundation at (714) 347-7900 or foundation@stjoe.org, or by visiting sjo.org/donate for an online donation.

Proposed rendering

New Patient Tower for Women

To ease the journey of our maternal patients, St. Joseph Hospital is consolidating mother and infant services — which are currently housed in different buildings across campus. Scheduled to open in 2023, the Main Street Women's and Family Center will unite medical offices and outpatient perinatal services under one roof, creating efficiencies that benefit both the Hospital and our patients. This building will also significantly increase capacity and square footage, allowing St. Joseph Hospital to better serve our community.

Dynamic Women

Dynamic Women Grow in Mind, Body and Spirit

Dynamic Women provides a forum for philanthropic women of all ages and backgrounds, to explore and discuss a variety of topics and to learn about how St. Joseph Hospital is supporting our community. Last year, this group of women participated in a three part series on mind, body and spirit to learn from physician leaders on the subjects. Jeannine Loucks, MSN, RN, BC PMH, Department Manager of the Emergency Care Center ECDU, spoke on mental illness and how St. Joseph Hospital is providing resources for the community. Dr. Raymond Casciari, St. Joseph Hospital Senior Advisor and Past Chief Medical Officer, addressed the latest trends in medicine that are in the headlines. The final gathering for the year featured Cathy Fletcher, MAOL, SPHR, SWP to teach everyone how to find joy, and stay connected and inspired to maintain your spirit.

If you would like to be part of this exciting group of women, please contact Shannon King Ginter at (714) 347-7900 or shannon.king@stjoe.org.

Retired Physicians, Drs. Navin and Ranjan Amin, Give Back

Over 50 years ago, Navin and Ranjan met while in medical school half the world away in India. The couple found they had much in common, especially that they were both equally compassionate and wanted to help humanity. Fast-forward many decades later, the couple became successful, respected physicians in their own fields: Dr. Navin Amin, an ENT Otolaryngologist who worked at St. Joseph Hospital for many years, and his wife, Dr. Ranjan Amin, a psychiatrist for the Los Angeles court system in Norwalk. The couple moved into their Cowan Heights home in the late 80s and have been very much a part of the community since then.

Now retired, Drs. Amin decided they were at the right time in their lives to downsize, but more importantly, to give back to the community they cherished in a significant way. The doctors decided to transfer the deed to their beautiful hilltop home to St. Joseph Hospital and established a charitable gift annuity (CGA). The Amins enhanced their personal financial security by way of the CGA and will receive an annuity payment for both lives; the annuity is guaranteed by the Hospital. They also receive a current tax deduction.

This gift will make a positive impact on the Hospital and the communities we serve — an impact far beyond what they could have envisioned. We are deeply gratified for the Amins' extraordinary generosity. Their \$1.7 million gift will fund Nursing Excellence and Behavioral Health.

Corporate Partners Profile – Centaurus Financial, Inc.

Ron King, Chairman and CEO of Centaurus Financial, Inc., has a long-standing relationship with St. Joseph Hospital. All three of his children were born here, and St. Joseph Hospital has always been the hospital of choice for his entire family. After being introduced to the St. Joseph Hospital Foundation by his dear friend and Foundation Board Member, Allan Uyesugi, Ron wholeheartedly committed his support to St. Joseph Hospital because of the wonderful care the hospital provides to all of its patients and its dedication to the core principles of compassion, dignity, justice, excellence and integrity. Centaurus Financial, Inc. shares similar values and Ron and his team have worked hard to create a culture of caring within the company where his father left a legacy of being supportive of one's colleagues, partners and the community.

Under Ron's direction, Centaurus Financial, Inc. has been a Title Sponsor at the St. Joseph Hospital's Annual Golf Tournament and has generously supported the Celebration fundraiser. These events have become a

family affair as his sons, who also manage Centaurus Financial, Inc., continue to attend these events. Centaurus Financial, Inc. is also a Corporate Partners advocate and encourages other businesses to consider partnering with the Hospital to help the culture in their organizations.

"I love St. Joseph Hospital, the doctors, the values and especially the Sisters' legacy of helping the community," Ron shares. "My involvement with St. Joseph Hospital has been a great experience and the feeling of giving back to something as essential as our health and well-being is just good business."

To learn more about the St. Joseph Hospital Corporate Partners program, contact Shannon King Ginter at (714) 347-7900 or shannon.king@stjoe.org.

Charice and Ron King with Abtin Khosravi, MD

Foundation Board Member Spotlight

JENNIFER KOVAC

Jennifer Kovac joins the St. Joseph Hospital Foundation Board with more than 12 years of experience as the Provider Relations Manager at St. Joseph Hospital. Jennifer is responsible for enhancing physician awareness of hospital services and working to improve physician retention.

Jennifer's community involvement spans many years in the National Charity League, Inc.® Orange/Villa Park Chapter, PEO, Assistance League of Santa Ana, St. John's Lutheran Church of Orange, and Catholic Charities Meals on Wheels. Also, she has volunteered for the St. Joseph Hospital No One Dies Alone program and Hospice program.

She has been an active volunteer at Foundation events for the last 10 years and has partnered with Foundation Major Gift team members to build relationships between the Foundation and physicians as well as assist with physician referrals for donors.

Jennifer and her husband, Gary, live in Orange and have two college-age children. She looks forward to serving on the Foundation Board so she can take her support to the next level!

2020 GOLF TOURNAMENT

Swings Into Success

This year’s sold out Golf Tournament was held at the beautiful Pelican Hill Golf Club in Newport Coast on March 9. More than 300 golfers enjoyed a day that included two 18-courses of golf, driving range, putting contests, a variety of restaurant offerings, spirit and beer tastings, a reception, an awards dinner, raffle drawing opportunities and a ceremony celebrating this year’s Physician Honorees: David C. Pan, MD; Brian Kim, MD; Michael Y. Chan, MD; Warren D. Johnston, MD; Thomas C. Kim, MD; Brian C. Kolski, MD; Rasoul Mokabberi, MD; Aidan R. Raney, MD; Lawrence J. Santora, MD; Shalizeh Shokooh, MD; and Kelly J. Tucker, MD.

The event netted more than \$397,000 in support of the St. Joseph Hospital’s Cardiovascular Program with the help of many sponsors, including Centaurus Financial, Inc. “What a great day, one of the best tournaments. The St. Joseph Hospital Foundation did a fantastic job, and provided a fun-filled day for golfers and their guests.

Centaurus Financial, Inc. is proud to be the Title Sponsor again this year,” said Ron King, Chairman and CEO.

“We were so blessed to have such a beautiful day shared among friends, patients and sponsors,” said Joseph Conway, President of Diversified Investment Services, Inc. and co-chair of the tournament. “It was one of our most successful tournaments and thanks to all of the generous support, we raised much needed funds for St. Joseph Hospital’s nationally-recognized Cardiovascular Program.”

“First class and by far one of the best tournaments,” said John Cebula, co-chair of the tournament. “All of the hard work and efforts truly showed and the outcome was record-setting results supporting the Cardiovascular Program, which is leading the way in Orange County.”
